Practical - 2 (Music Store Page)**

**Objective:** To create a webpage related to music store.

A music store page is a perfect experiment for music lovers. To build this page, you must know the nitty-gritty of HTML5 and CSS3.

**Exercise:**

On the music page, the first thing to do is to add an appropriate background image and write a short description of what you will find on this page. The header section of the page will contain different menus that list songs based on features like genre, year, singer, album, and so on. Add relevant links and images for the collection of songs available. At the footer, you can include contact details, and links for registration, in-store purchases, subscription packages, and trial options.

**Website hosted on :** <https://yslmusicstore.000webhostapp.com> (code can also be seen by using 'view-source' on website)

**Website Preview (Right Tab):**

The website has a purple header with the title "YSL MUSIC STORE". The main content area features a large image of a woman singing into a microphone, with the text "DISCOVER THE REAL MUSIC WITH YSL MUSIC STORE" and a "CONTACT US" button. Below the image, there is a caption: "As per the scriptures the real music is what glorifies the Supreme Lord, his form, his activities, his pastimes. Discover the real music with YSL Music Store!"
